Tech Support**

- <http://www.eclipse.org/> - Use this URL to download Eclipse.
- Once the Home Page is loaded. Click on “Download Eclipse”

- A new page will be loaded with “Eclipse Download” options.
- Please select your Operating System from right corner drop box (Pointed as **RED** below)

The screenshot shows the Eclipse Downloads website. The main heading is "Eclipse Downloads". Below it, there are tabs for "Packages", "Developer Builds", and "Projects". The "Packages" tab is selected. The main content area lists several Eclipse packages, including "Eclipse IDE for Java EE Developers", "Eclipse Classic 4.2.2", "Eclipse IDE for Java Developers", "Eucalyptus Private and Hybrid Cloud Software", "Eclipse IDE for C/C++ Developers", and "Eclipse for Mobile Developers". Each package has a download icon and a link to "Details". A red circle highlights a dropdown menu for selecting the operating system, with options for "Windows", "Linux", and "Mac OS X (Cocoa)". The dropdown menu is currently open, showing the "Windows" option selected. To the right of the dropdown menu, there is a section titled "Installing Eclipse" with links for "Install Guide", "Compare/Combine Packages", "Known Issues", and "Updating Eclipse".

Eclipse

- You will have 2 options for Windows – 32 bit and 64 bit.
- Check your System Configuration with the steps below:
 - - Go to Desktop → Right Click “Computer” → Click on Properties
 - A new Screen will show up → Check “System” block → Check “System type:”
- If this shows 32 bit Operating System. You need to download 32 bit Eclipse installer.
- If its 64 bit, please download 64 bit version.

System

System

Rating:

3.4 Windows Experience Index

Processor:

AMD Athlon(tm) Dual Core Processor 5000B 2.60 GHz

Installed memory (RAM):

2.00 GB (1.75 GB usable)

System type:

32-bit Operating System

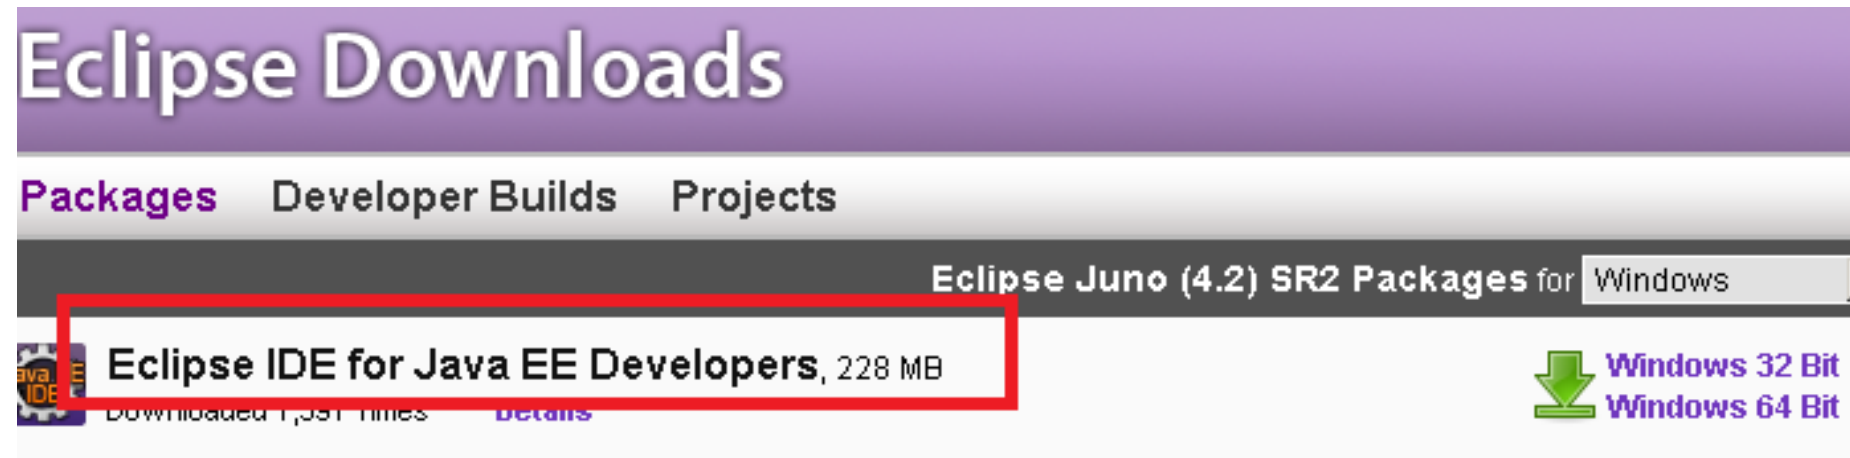

Pen and Touch:

No Pen or touch input is available for this Display

Computer name, domain, and workgroup settings

- Select “Eclipse IDE for Java EE Developers”

- Click on Windows version you found in last side: (it was 32 bit for me, so I will click “Windows 32 bit”)
- Page will route to mirror site selection. Click on green download button:

Eclipse downloads - mirror selection

All downloads are provided under the terms and conditions of the [Eclipse Foundation Software User Agreement](#) unless otherwise specified.

Download eclipse-jee-juno-SR2-win32.zip **from:**

[\[United States\] XMission Internet \(http\)](#)

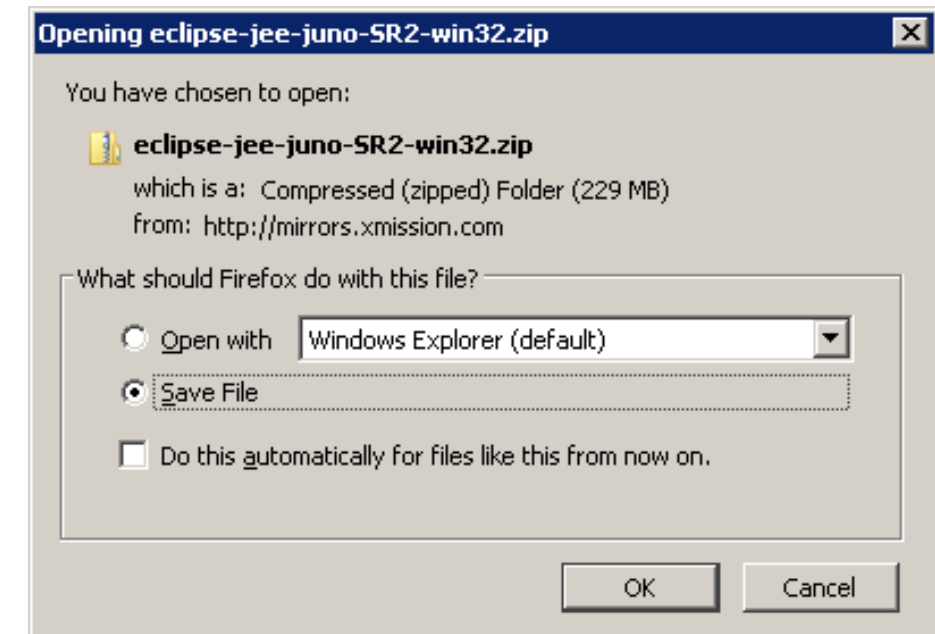

Checksums: [\[MD5\]](#) [\[SHA1\]](#)

...or pick a mirror site below.

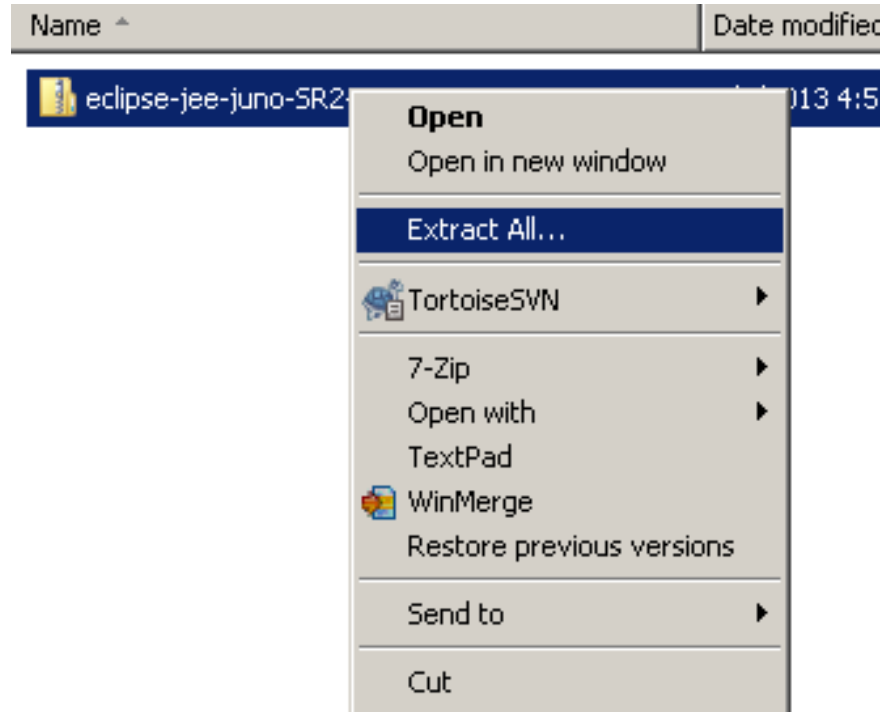

- Depending on Browser, you will get an option to save the file. For Mozilla Firefox, I get the option like adjacent screenshot. Please save the file in preferred location.
- Its easy to find with a logical location like : C:/H2K/JavaTraining
- Download may take some time, depending on your internet speed.
- Once file gets downloaded, you should be able to see:

*eclipse-jee-juno-SR2-**win32**.zip or eclipse-jee-juno-SR2-**win64**.zip*

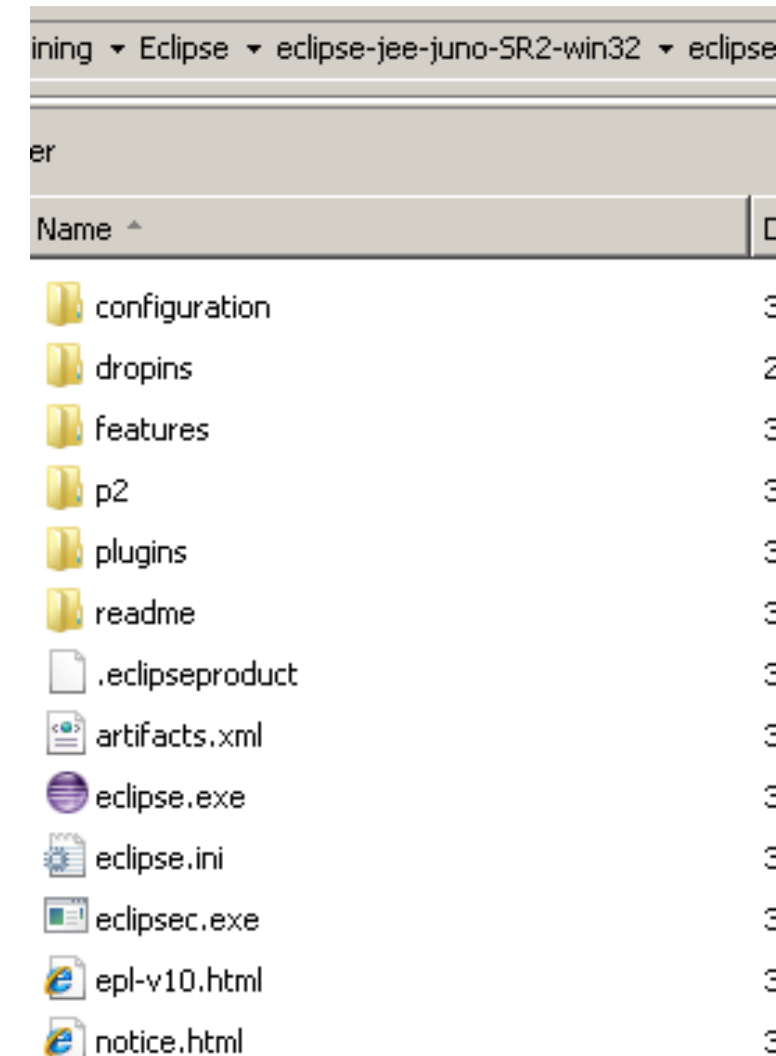

Depending on file you chose to download.

- Right Click the Zip file and choose “Extract All” (You might need WinZip or 7zip already installed to extract this file).

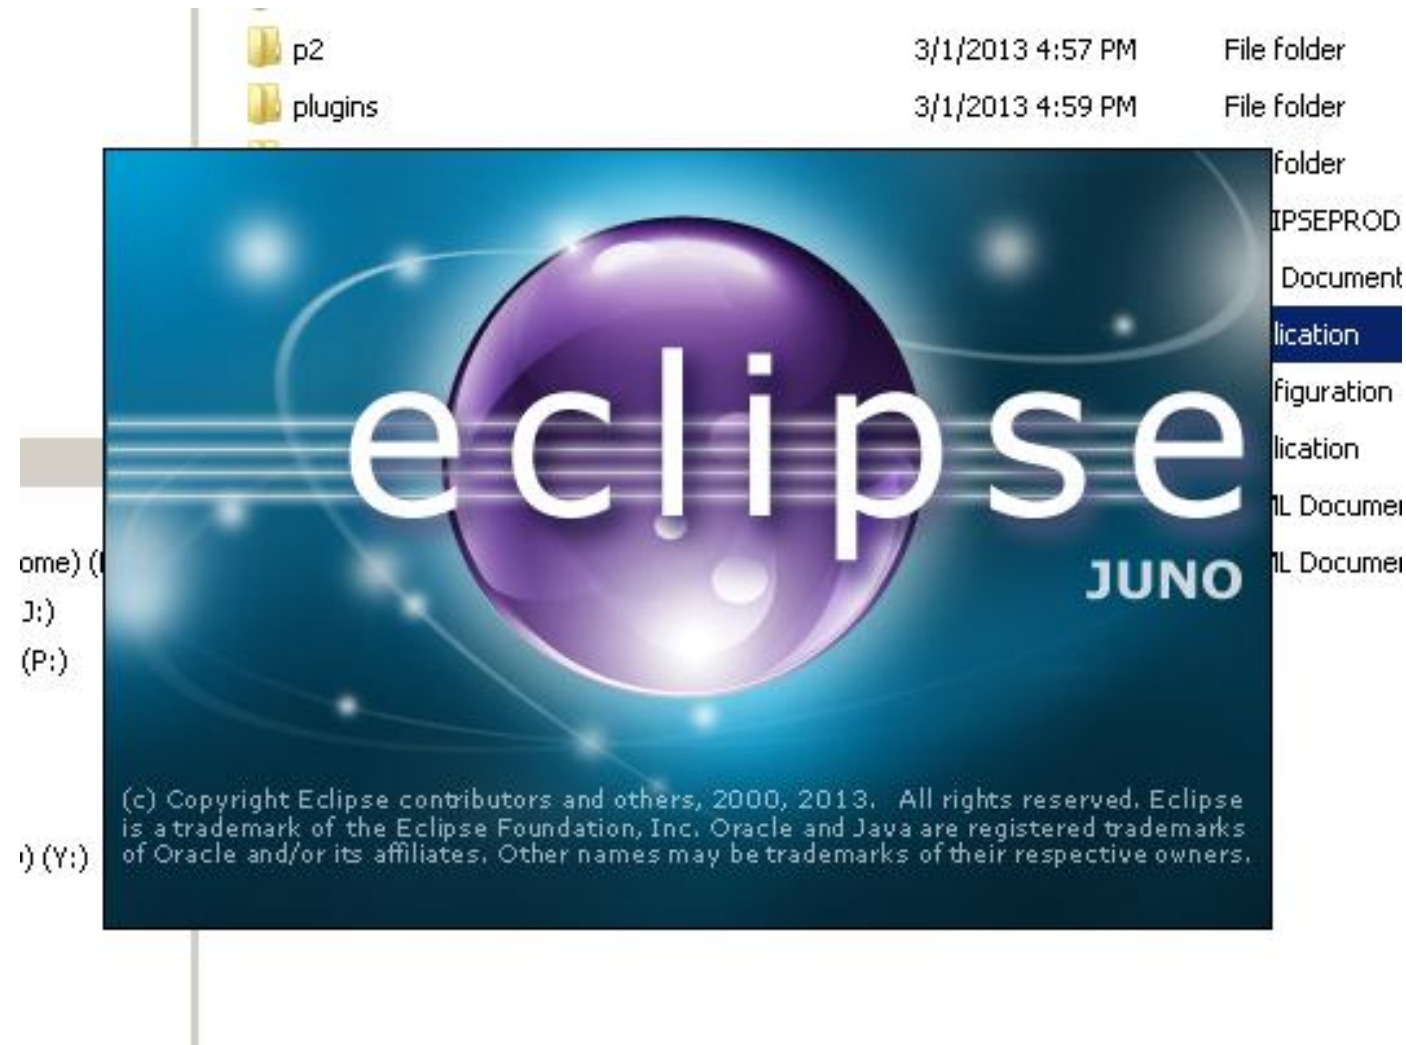

- Once file is extracted, you will be able to see “eclipse” folder in it.
- Open eclipse folder, you will be able to see all eclipse files. →

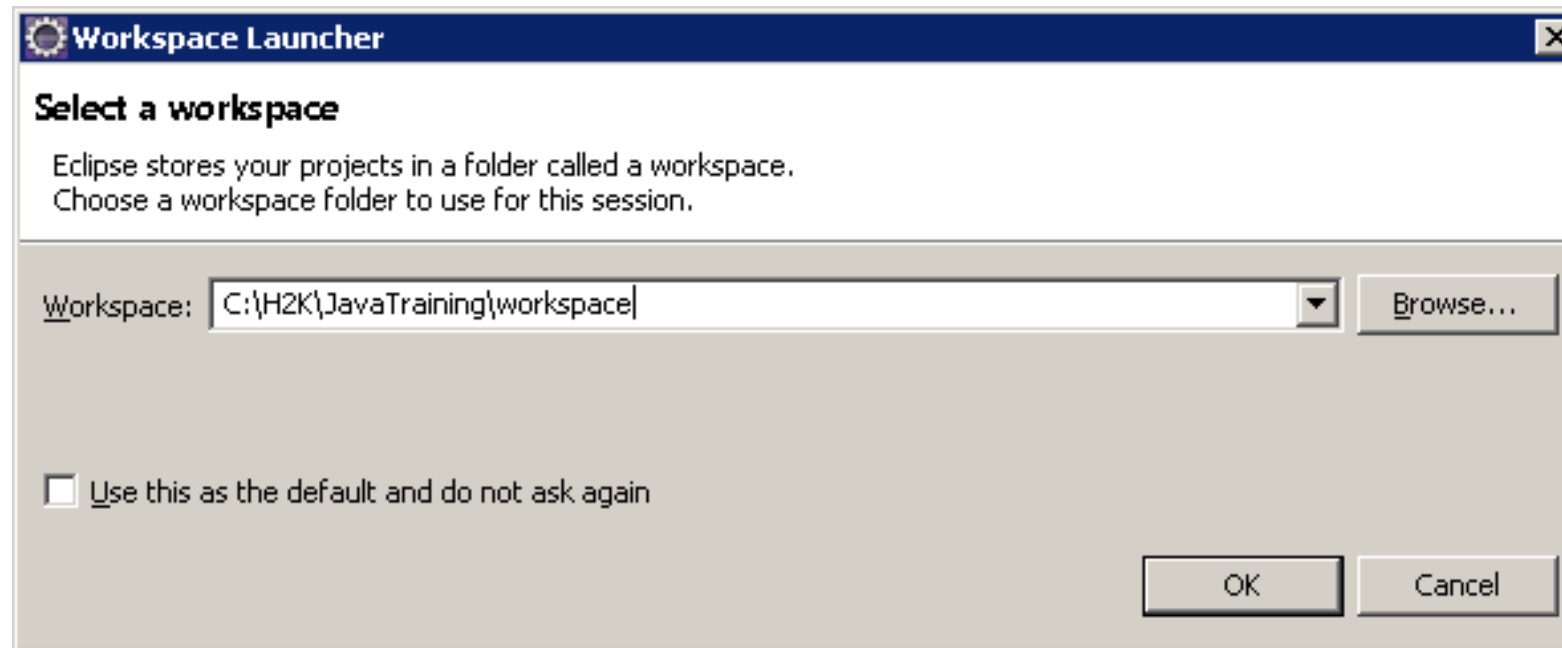

Eclipse

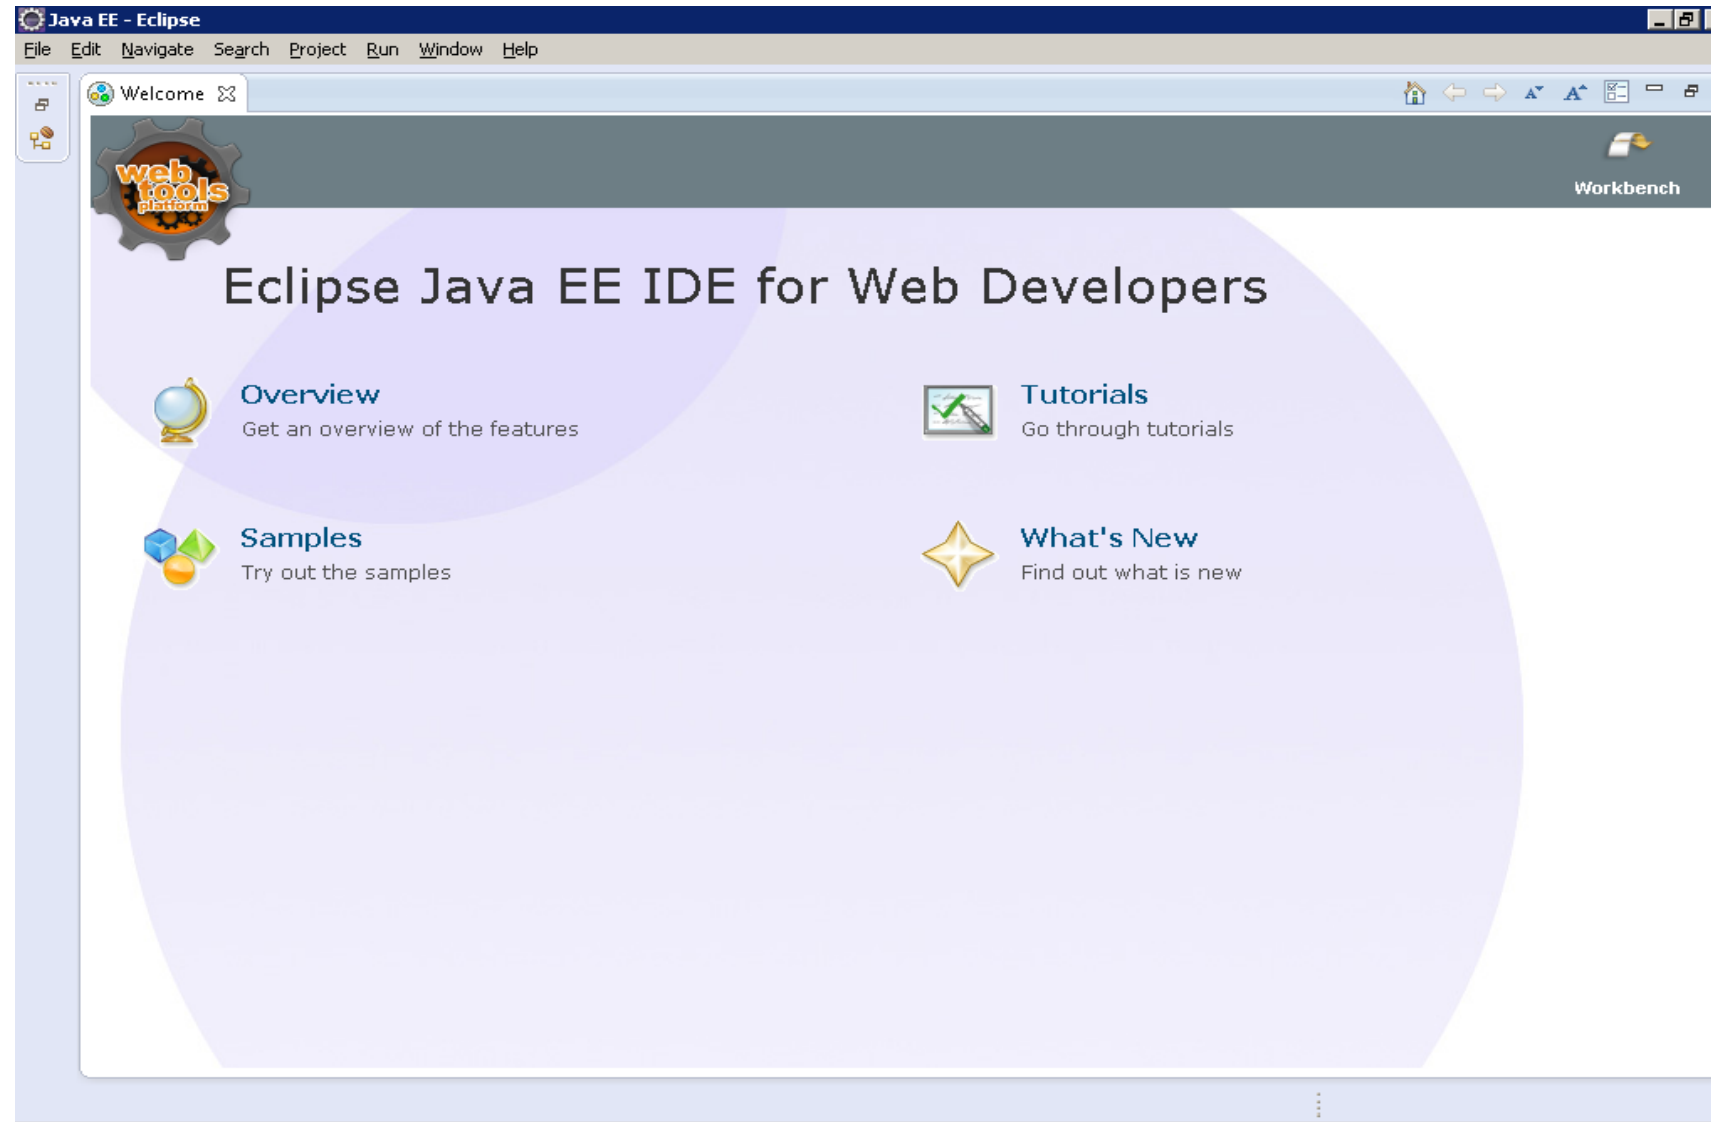

- Double click on “eclipse.exe” – eclipse will be running on your machine.

- Workspace launcher will open to confirm the path of workspace.
- Please type : C:\H2K\JavaTraining\workspace, then click on 'Ok'

- **Congratulations!!!**
- Eclipse is now running on your computer. Wish you best luck for Java Journey ahead!!

Thank you

Your feedback is highly important to improve our course material and teaching methodologies. Please email your suggestions.
